

Panther 200 Conventional (P200C)

CORROSION CONTROL

Panther 200 Conventional (P200Z) Kit

ZINC RICH COATINGS

The P200C is a general purpose conventional air spray gun for the corrosion control market. Designed for spraying in harsh environments, this gun has the break-up power to atomize heavy, high solids coatings. The gun body is anodized PTFE to aid in clean-up and to extend the life of the gun.

The P200Z version has a delrin tipped fluid nozzle to prevent plating and a unique leather / PTFE packing arrangement. Together these features increase spraying time before the gun needs to be cleaned. The 'Z' version is designed for spraying zinc-rich coatings.

P200Z Kit comes complete in case and includes 3 x needle/nozzle kits, 2 x air caps and gun wrench.

AIR INLET: 1/4" BSP
 FLUID INLET: 3/8" BSP
 NOZZLE KIT: 1.8(Z), 2.2(Z), 2.2mm
 AIR CAPS: 2062T & 2064T
 Part No: CP-ZPACK

P200C sold individually, choose options from table below.

Part No: P200C-XX-XXXX (eg; nozzle size/air cap)

Nozzle Size (mm)	Air Cap	CFM
1.4	2797	21
1.8	2797	21
2.2	2064T	22
2.8	2062T	19
